FLORIDA STATE LIBRARY

# REPORT OF STATE COMPTROLLER FOR YEAR ENDING DECEMBER 31, 1920

Tallahassee, Fla., January 1, 1921.

Honorable S. J. Catts,  
Governor of Florida.

Sir:—

In pursuance of the requirements of law I have the honor to submit herewith a report of the financial condition of the State, and the operations of this office, for the fiscal year ending December 31st, 1920.

## STATE FINANCES.

Owing to the unusual expenditures made necessary by appropriations in 1917 for citrus canker, livestock, sanitation and other important but new purposes, and the increased cost of conducting State institutions due to the high price of food, clothing, etc., and to meet such conditions as far as possible, the Legislature of 1919 fixed a levy of five mills for general revenue purposes. This tax, owing to the most rigid economy and careful expenditures, and the close collection of the taxes for that year, enabled the administration to meet all appropriations. And in order that the taxpayers might have the fullest advantage of every possible means at hand, the tax rate for 1920 on the recommendation of the Comptroller was reduced one mill on account of general revenue, and notwithstanding this reduction ample funds were in the State Treasury on the first day of January, 1921, to meet all disbursements, including the additional requirement of approximately \$200,000.00, which will

## VI

have to be met by the Legislature in a special appropriation to cover the deficiency in the amounts appropriated by the last Legislature for the Florida State Hospital and Florida Industrial School for Boys, due to the high prices of everything necessary for the use of these institutions. The balance in the General Revenue Fund at the close of business 1920 was \$629,579.78.

Particular attention is invited to the tables in the following pages showing abstracts of receipts and disbursements and balances on hand in the several State funds.

### COUNTY FINANCE DEPARTMENT.

The work of the County Finance Department has been handled the past year with increasing satisfaction to this office. With each year's experience in the operation of this law the Clerks of the Circuit Court and the School Superintendents are becoming more familiar as to the method of making up their financial reports, and there are fewer counties to which it is necessary to send an accountant to assist the county officials in making up these financial statements. However, there are yet some counties where it is found necessary to furnish assistance, and some counties where it is found necessary to send an accountant in order to secure a report within a reasonable time. These reports are promptly audited in this office and arranged for publication. Under the operation of this law the people of the several counties are enabled to have published for their information comprehensive financial statements of receipts and expenditures of all their county finances. This branch of the work has been of much assistance to the counties and should be continued.

## COUNTY DEPOSITORIES.

Since the county depository law has been in effect it has been the duty of this office to act as custodian of county depository bonds, whether those bonds be surety bonds or coupon bonds. The responsibility is placed on this office at this time to act as custodian of a considerable amount of coupon bonds, which entails the responsibility of the safe keeping of valuable securities and also the work of clipping the coupons and dispatching them to the various banks to which the bonds belong at sundry seasons and dates, and keeping proper record of the same. The working out of this law means also that this office must keep records to see that each county has properly provided a bonded depository for each and every fund of the county; also the amount of bond given by each of such depositories, and if a surety bond, that it is in a sufficient amount, and if coupon bonds, that a sufficient amount of them is lodged with this office at all times during the period the depository is qualified to receive county funds. Each county has from one or two to as many as eight or ten depository banks. This means several hundred depositories, and the aggregate securities run into the millions.

## BANKING DEPARTMENT.

The Annual Report of the Banking Department evidences the fact that the State of Florida has fared unusually well during the financial depression that has obtained all over the United States.

The surplus and undivided profits of the banks show a very gratifying increase and the reports indicate that dividends have been paid as usual, and that the deposits, including individual deposits, savings deposits and certificates of deposit, have materially increased. This is especially true as to the saving deposits, which is a

## VIII

source of great satisfaction, as it shows that the citizens are saving their money.

During the past year two banks were placed in the hands of receivers, one at Kissimmee, with deposits of \$447,790.08 and assets of \$698,140.41, and the other at Molino, with deposits of \$58,129.58 and assets \$86,125.96. There is one bank that is liquidating and has less than \$2,000.00 of deposits as against about \$8,000.00 of assets; but with these exceptions the tendency of the banks, as a rule, has been upward, although probably somewhat retarded by conditions existing all over the country.

These are the only two banks that have been closed since 1918.

Careful thought and consideration has been given for some time to the laws governing trust companies, and to a plan for providing a more comprehensive examination of trust companies and the trust department of banking and trust companies. Practically all of the trust companies in Florida have been organized since the Act of 1911, and for some years the trust business done by them has been small, but of late there is a marked increase of the amount of purely trust business confided to these institutions of a peculiarly fiduciary capacity, and in view of the fact plans are under way in this office for conducting examinations of trust companies and the trust department of banking and trust companies by examiners with special qualifications for this kind of bank examination work.

In order to show in part the importance of carrying out this program, I need only to call attention to the very wide powers granted to trust companies under the trust law and recent amendments thereto. The law now authorizes these companies to execute all kinds of trusts, including those for married women in respect to their separate estates, and as guardians, trustees or receivers for minors and their estates, and to execute all other such legal trusts, duties and powers in regard to the holding.

management and disposition of any estate, real or personal, etc. It also authorizes them to make and certify abstracts of titles and make insurance of every kind pertaining to or connected with title to real estate. It is also suggested for the consideration of the Legislature that recent Federal legislation has authorized national banks to exercise powers and privileges of trust companies. The exercise of this particular function will, of course, be subject to the supervision of the State Comptroller, and this will add to the work of the banking department of this office.

It is believed that in view of the above-mentioned facts, it is an opportune time to begin a wider and more constructive program of examination and supervision, and to this end it is hoped the Legislature will make some more adequate allowance in the matter of salaries for the bank examination work and the examination of the trust companies, and the trust departments of State and national banks exercising trust functions under the State law. These suggestions and recommendations are made, not because this office does not believe the present officials of the banks and trust companies in Florida to be men of the highest type—able, competent and conscientious—but if the examination work is to be made of the most service to them, as well as to function properly for the State on behalf of the depositors and customers of those institutions, the time has now come when this step of progress should be made in the banking department.

Taking the bank exhibit as shown by the report covering the resources and liabilities, it should be evident that the people of the State of Florida have been less affected by the conditions that exist throughout the country than in many other States, especially in the Great Northwest, where prosperity has almost always been enjoyed. This condition should give confidence not only to the officials of the banking and trust companies but also to all the people of the State of Florida, as conditions are gradually

improving, and while such progress will be slow it is felt that the upward trend in business conditions has actually commenced and that no State in the Union is in better condition to take advantage of the opening now presented them than the State of Florida. Naturally, the depression and change in conditions and the great hardships that were precipitated by the war proved a very serious burden on many of the citizens in this as well as other States, but the evidence is at hand to show that this State did not suffer more than other States, and in fact, owing to its diversified resources and productive interests, Florida has passed through the crucial time with what might be said to be "flying colors."

From long and careful observation, I am pleased to say, according to my best judgment, that the banks of the State of Florida, both State and national, are as a rule as well and successfully managed as any banking institutions in the United States, and the personnel of these institutions, taken as a whole, is above the average. Hence, the recommendation made by me with reference to examinations of banks and trust companies, including such national associations that may be empowered to conduct a trust business, is not based upon any lack of confidence in the bank officials, but on the other hand is the outcome of my earnest desire to render such valuable assistance to the officials of these institutions as was evidently intended by the Legislature when the supervision of banks and trust companies was placed under the jurisdiction of this office.

### RECEIVERSHIPS.

When a bank is placed in the hands of a receiver the final liquidating of the institution, as a rule, takes some time to accomplish. The receivers have considerable correspondence with this office, and all distribution of dividends and funds made by them are kept of record in this

office and the individual checks for such distributions are required by law to be drawn by the Comptroller and made of record in his office. There are, at the present time, some fifteen or twenty of these receiverships still in process of liquidation, and for which this office has to keep records.

### MOTOR VEHICLE LICENSE DEPARTMENT.

The administration of the motor vehicle license law has now been in the Comptroller's office for three years. There were some necessary legislative changes in 1918 following a Supreme Court decision of the construction of the Act of 1917. Following these amendments made by the special session of the Legislature in 1918, there has been no further changes in the law so that for two years the law has been in operation as it now stands.

The number of motor vehicles licensed have increased each year, there having been in 1918 53,687 registrations; in 1919, 60,921 registrations; and in 1920, 80,163 registrations. These are the net registrations after eliminating the cancellations. The number estimated for 1921 is approximately 100,000. With reference to the amount of money collected through the administration of this law, there was collected in 1918 \$338,471.50, in 1919 \$401,317.40 and in 1920 \$554,695.14. The receipts for 1921, it is estimated, will run over \$650,000.00.

The law requires considerable record work in the Comptroller's office, and from the standpoint of the record information alone, it seems to have furnished valuable information to various peace officers of the State, as well as individual citizens. Every day of the year brings numerous requests by letter and by telegram for information that can be had only from the automobile license records, all of which is promptly furnished. The system of registration required to meet the provisions of the law entails careful handling and grading of the license

## XII

applications in order to insure that the correct amount of license is collected and that proper series of license tags are issued to cars of the various horsepower ratings, and to trucks of the various tonnage capacities. Also to insure that the numerous other requirements of the law are complied with by the applicants in filing their applications for license.

There has been a marked improvement in the number of applications reaching this office correctly made out, but there are still a large number that arrive defective in some vital point. All applications arriving here in proper form or that can be perfected by any effort of this office, are promptly handled and do not remain in this office on an average of more than twenty-four hours after receipt before the tags are placed in the mails. During the heights of the rush season from about December 25 to January 30, applications arrived at this office at the rate of an average of over 2,000 a day. Even during the most congested part of the season applications do not remain over forty-eight hours in process of registration before the tags are in the mails, if the application is found to contain all essential data.

The correct handling of such a large number of applications in a limited time means considerable clerical work and the necessity of using a number of temporary employees necessarily untrained in the work, but it is believed it is now so well organized and plans are so thoroughly gone over in advance of the rush that the service rendered by this department has on the whole been very satisfactory to the automobile owners of the State. Numerous letters received here indicate that such is the case.

It is recommended that the law be so changed as to provide for only one metal license tag instead of two, this tag to be attached to the rear of the motor vehicle. This change in the law would save considerable in the cost of tags, and I am informed that probably in a

good many cases one pair of tags is now made to serve two cars, and thus the State deprived of the revenue from the license one of these cars should pay.

There is one feature of the law that has been rather difficult to administer because of the automobile owners not being familiar with the fact that the license tags are not transferable from one car to another car, but that the law contemplates the tags shall follow the car for which issued throughout the license year, regardless of the number of times the motor vehicle changes owners. It is found that in a great many instances upon the sale or exchange of a car the owner detaches and retains the tags and places them on an entirely different car, frequently one to which that series of license is in nowise applicable. This causes confusion upon any subsequent inquiry to this office concerning that license, and complaints frequently come in regarding wrong series of license on a car which came about in the manner above mentioned.

Another feature of this law that has given some trouble in its administration has been the section with reference to automobile dealers' license. It has been found that individual owners of cars already licensed when trading the same in to a dealer, have been advised to retain their tags as the dealer would use his own tags on the second-hand car traded in. This caused confusion, for the reason that the individual owner would then use his old tags on the new car purchased regardless of the fact that such was not contemplated by the law. Also dealers have frequently made use of paper tags or card-board tags for use on their own demonstration cars as well as to provide "license applied for" tags on cars sold to customers instead of attaching to them, for temporary use, one pair of their own dealers number plates, as contemplated by the statute. It is suggested that the law might with benefit be amended so that dealers in motor vehicles could secure as many license plates as they desired under one

#### XIV

distinctive number, but would pay for those plates the same price as an individual owner would for the same make of cars. In this way the motor vehicle fund would not be subject to lose revenue, and it would also remove the temptation for dealers and individual owners to detach license tags from second-hand cars traded in and place them on other cars for which they were not issued.

It is also recommended that such amendment be made in the law as will discontinue the issuing of tags in so many different letter series. Motor vehicle license tags are now issued in series A. B. C. D. E. F. M. W. X, Y and Z. This means that in the contract with the factory for the manufacturing of these tags an ample supply of each series must be ordered, and therefore a larger number than necessary is left over at the end of the season. If only one series of numbers were used, and they were not classified into letter series, there would be fewer tags left over at the close of the season, and the cost of manufacture somewhat lessened. Some other changes in the motor vehicle law will be suggested for consideration of the Legislature at its next session.

It will be noted from the comparative table published elsewhere in this report that the number of chauffeur licenses issued has materially decreased instead of increased since the first year the law was enacted. It is quite evident from the number applying for registration as chauffeurs that this requirement of the law is not generally complied with. During the year 1920 there were only some 2,000 chauffeurs registered, when as a matter of fact if all had registered as chauffeurs who should have done so the number would have been very likely 10,000 or more. In this connection it is also suggested that if some provision were made for field inspectors, either operating under the direction of this office or under the direction of the Sheriffs of the several counties,

it would be found that there would be a material increase of the number of cars registered, and as a consequence a similar increase of the revenue received through this department.

### BLUE SKY LAW.

The wave of stock-selling propositions that has been afflicting the other portions of the country has manifested itself in this State, and as a result the number of applications for permits to sell stock in Florida are constantly increasing. In 1919 the number considered were 35; in 1920, 95, the greater portion of which were presented during the latter part of the year.

From our experience in administering the law the statute should be amended so as to allow the Board more discretion in passing upon these cases, if it is to afford the public much protection from doubtful enterprises. The volume of the work has increased to such proportion that it requires a considerable part of the time of one clerk to keep up with the work and the fees paid are relatively too small for the time consumed and are out of proportion to the amount charged in other States for similar services. For instance, the filing fee in this State is \$5.00, while in other States it is usually \$25.00 to \$100.00. The registration fee for agents is \$1.00 per annum while in other States it is usually \$10.00 per annum. Bills to meet these conditions will be presented to the Legislature seeking to remedy the defects pointed out.

### PENSIONS.

It is a source of great pleasure to me to be able to record the fact that the Legislatures of 1917 and 1919 made better provision for the patriotic pensioners and their widows by not only adding to the amount of com-

## XVI

pensation, but allowing the warrants to be sent to them monthly, thereby preventing many hardships that had occurred in the past, and filling the hearts of many with pleasure at so little expenes to the State. The monthly payment of pensions has been taken care of without increasing the expenditure for clerical hire or otherwise in this office except for postage necessary to mail the warrants. It is hoped that a further increase can be made without adding too much to the burden of taxation.

### TAX CERTIFICATES.

With the cordial co-operation and assistance of the Clerks of the Circuit Court, and the faithful discharge of duty by the Clerks in this office, it has been possible for the past four years to obtain from the Clerks of the Circuit Court the amount of money collected from the redemption and sale of tax certificates each month, and to distribute the same promptly before the end of the year. The reports as distributed annually represent the twelve months from December 1st of one year to November 30th of the next year. This was not the case prior to my entering upon the duties of this office, but feeling that there was no reason why prompt settlements should not be made in this as well as all other cases the result mentioned was brought about. To show how the volume of work in this department has increased during the past four years I give the receipts for 1916, which were \$386,178.78 as against \$839,281.78 for the year 1920.

### VOLUME OF WORK GREATLY INCREASED.

Legislatures have from time to time placed in this office for administration new departments and new laws requiring considerable time and work to administer, and provided no help or insufficient additional clerical help, properly to administer such laws. Sufficient clerical help

in the regular office force to take care of the large increase in the volume of work required to be done in the Comptroller's office has not been provided. For this reason it has become imperative for the Comptroller to utilize clerical help employed under the authority of one law to do work required by another law for which no clerical help was provided. As is well known the Comptroller's office is considered by the general public as a bureau of information, and this is not without some reason, because so much of the official business of the State necessarily flows through this office. It is a pleasure to the Comptroller and his clerical personnel to render this service but it should not be overlooked that much time of the clerical force is required to take care of this additional work. In this connection it is felt proper to state that in the past four years the volume of work handled through and by the Comptroller's office has increased over 100 per cent. The number of claims and bills against the State audited, and warrants issued therefor, amounted four years ago to about 40,000 each year, and now there are more than 100,000 issued in the course of a year. As the work in the various counties grows in volume, it means that that growth is multiplied in this office by the number of counties in the State. This increase in the volume of business has not only brought its problem of adequate clerical force, but it has brought about a very acute problem as to floor space in which for the work of the office to be done. Several years ago in the last apportionment of space in the Capitol building to the administrative officers, the Comptroller received barely sufficient office room to meet his urgent needs, and now with the great increase of work placed in the office it is absolutely essential more floor space be provided in some way or the efficiency of the office will be seriously crippled, and the handling of the work greatly retarded. This fact cannot be too strongly emphasized. It is to be hoped that the Legislature will give it prompt and careful consideration.

## XVIII

### GOOD COLLECTIONS LAST YEAR.

Last year was a good year from the standpoint of the amount of taxes collected and the small percentage shown to have been uncollected by the reports of the Tax Collectors. All the Tax Collectors of the State, with but one exception, closed their 1919-20 tax assessment rolls, and the table which will be found elsewhere in this report, shows the percentage of taxes collected, the percentage of land sold for taxes, and the percentage of uncollected personal property tax closed out through the list of errors and insolvencies. By reference to this table it will be seen that the relative amount of land sold for taxes is quite small, and much less than is generally believed by the citizens of the State. Attention is also called to the fact that for the past two or three years the amount of money coming back through tax redemptions to the State Treasury and to the several counties has been quite large, showing that of the land sold for taxes most of it is redeemed later by the owners. The amount received from tax redemptions last year was \$839,281.78, and this amount was promptly distributed to the State Treasury and to the various counties, as it is the policy of this office not to permit tax redemption moneys to remain in its custody any longer than absolutely necessary for the clerical work of distribution to be done.

In conclusion would say that the watchwords of this office are "efficiency and service at a minimum cost." The responsibilities resting upon it are not lightly regarded, and it is believed that the character of service rendered is constantly being improved and its efforts have received—upon the whole—the approval of the people of Florida

Respectfully submitted,

ERNEST AMOS,  
Comptroller.

## STATISTICAL TABLES

---

### RAILROAD AND TELEGRAPH LINES

The annexed tables show in detail the assessment of Railroads and Telegraph lines, made by the Board, consisting of the "Comptroller, Attorney General and State Treasurer," created by Section 46, of Chapter 5596, of the Laws of Florida.

These are followed by statements showing the taxes assessed thereon.

STATEMENT SHOWING THE LENGTH OF MAIN TRACK, BRANCH, SWITCH AND SIDE TRACK AND ROLLING STOCK OF EACH RAILROAD IN THE STATE, AS SHOWN BY THE SWORN OFFICIAL RETURNS OF EACH RAILROAD, AND THE VALUATIONS ASSESSED THEREON BY THE STATE RAILROAD ASSESSMENT BOARD FOR 1920.

COUNTIES.	Main and Branch Tracks, including Roadbed and Right of Way.			Switch and Side Tracks			Value Ter- minals and Facilities	Pro Rata Value of Rolling Stock	Aggregate Val. Road, Roll'g St'ck, Term'l Fac.
